

UGX 130,000,000 Phase 1 Budget

Mbarara Integrated Concrete Products Factory | Funding ask and lean startup allocation

Total starter budget	UGX 130,000,000
Phase 1 startup cost	UGX 128,000,000
Protected cash buffer	UGX 2,000,000

Item	UGX	Status
Semi-automatic block/paver machine, mixer, vibrator	UGX 45,000,000	Essential quotation required
Starter moulds: 6-inch, 8-inch, solid, 60 mm, 80 mm, kerbstone	UGX 14,000,000	Essential only
Site preparation, curing yard, drainage, basic shed works	UGX 14,000,000	Lean starter works
Electrical and water connection setup	UGX 7,000,000	Essential utilities
Pallets, wheelbarrows, hand tools, racks, safety gear	UGX 8,000,000	Starter handling
Starter raw materials and packaging	UGX 24,000,000	Working stock
Permits, basic laboratory tools, compliance and safety	UGX 4,000,000	Basic QC only
Launch labour, security, administration	UGX 7,000,000	Opening month reserve
Sales, local transport, customer visits	UGX 3,000,000	Launch campaign
Unallocated cash buffer	UGX 2,000,000	Do not spend unless necessary

Deferred Until Cash Flow Supports Expansion

- Ready-mix batching plant and transit mixers
- Culvert production line and lifting equipment
- Drainage channel mould expansion
- Grass/permeable and cobblestone paver moulds
- Dedicated delivery truck purchase
- Advanced laboratory equipment
- Second production line and regional depots

Investment Discipline

The UGX 130M plan intentionally avoids buying a ready-mix plant, culvert line, heavy lifting equipment or a dedicated delivery truck at launch. This keeps Phase 1 focused on essential production, quality control, customer acquisition and working capital.

Data confidence: Estimated / Quotation Required. Re-verify all prices before committing capital.
